

Visio-conference students abroad

16/07/2020

Back to school

Context:

Back to school is planned on site

Students that cannot participate will be:

- Either in quarantine in Shanghai
- Either outside of Shanghai in time zones that are likely not compatible with real time teaching (except 2 to 3 slots).

For students out of Shanghai, the following set up is proposed:

- An online back to school meeting when the class starts
- A time-limited support until October golden week: online classes and exercises

Distance learning is not a choice but an alternative solution in an exceptional situation.

Families whom would choose to leave China during the summer run the risk of not being able to come back for school start (after quarantine). It is their responsibility.

Without visibility on the reopening of borders or their expatriation plans by August 15th families that are not in China are advised to enroll their children in a local French school.

Administrative issues

School fees and enrollment

Two situations:

If your child(ren) is de-enrolled

- Re-enrollment possible during the same school year without paying again registration fees (new students)
- School fees invoiced on a prorata basis from actual back to school date on site.
- Spot not guaranteed including in the language stream of your choice
- No distance learning

If your child(ren) remains enrolled and payment is made for the first semester:

- Guaranteed spot including in the language stream you have been confirmed
- Distance learning possible during the month of September
- Every semester started is due
