

## Estimated durations for returns trips (for 12:35 and 3:05pm return trips)

The following chart provides indicative durations for return trips per assembly point. The indicated times are estimations for reference only.

The school does not take any commitment on these times, that can be highly variable for a various type of reasons in a megalopolis like Shanghai (weather, traffic conditions, accident, special events may extend the times, while positive traffic conditions during Chinese holidays for example may shorten them).

The bus monitoring application works as a real-time indication of the localization of the bus and should be taken as a reference to estimate the time arrival at the assembly point.

All times are estimated from Eurocampus Yangpu and are calculated as the bus is leaving the parking.
